## Liquid Extraction Baler

### Performance Specifications

Nominal Bale Size	30" x 16" x 24"
Bale Weight Aluminum Cans	Up to 180 lbs
Bale Weight Plastic Bottles	Up to 250 lbs
Average Cycle Time	37 Seconds
Ejector System	Semi-Automatic
Compact Force	56,548 lbs

### Hydraulic & Electrical Specifications

Motor HP	15
Voltage	208, 230, 480
Pump GPM	15
Normal System Pressure	PSI2000
Cylinder Bore	6"
Hydraulic Tank-Capacity Gallons	22

Model V3016

Our liquid extraction baler drains and bales refuse beverage and liquid containers in one step. An internal system captures the liquid waste and diverts it to an approved drain. This makes it possible to bale refuse containers seven times faster than when liquids are extracted manually. A single bale can be made from up to 4,000 aluminum beverage cans and up to 2,000 plastic beverage bottles.
